

D6317

24 Channels Battery Charging Box

Description

D6317 is used for Charging IR Receivers. It has a high efficiency switching mode. Its input voltage is AC110V~120V/220V~240V, and it can charge 24pcs IR receivers per charge. It has a large capacity and its size is $45.5 \times 32 \times 34$ cm.

Features

- Used for charging IR receivers
- High efficiency switch mode
- Input Voltage: AC110V~120V/220V~240V
- Charges 24pcs of IR receivers per charging
- Dimension: $45.5 \times 32 \times 34$ cm
