

D6704 D6705

IR Conference Main/Deputy Receiver

Description

Enjoy Wireless Meeting Presentation, More Happy, More Efficient

It is really a very good solution for meeting, conference, and other similar scenarios.

Features

- Adopt embedded installation method, equipped with a safety rope, which is safe and reliable.
- 150-degree spherical reception and transmission, greatly expanding the signal coverage.
- Signal gain greater than 35dB.
- Adopt low power consumption circuit design.

Specifications

Model	D6704 D6705
Frequency Range	2MHz-3MHz
Power Supply	DC3V, powered by the control host
Current Consumption	100mA
Receiving Sensitivity	-100dBm
Receiving Gain	0dB
Output Impedance	50Ω
Interface Type	Network port

Dimensions	φ145×100mm
Weight	1.71kg

Front / Rear Panel

1. LINE B Working Indicator (Green, representing LINE B is connected)
2. LINE A Working Indicator (Red, representing LINE A is connected)
3. IR Signal Receiving Window
4. IR Signal Transmitting Window
5. IR Signal Output Port B
6. IR Signal Input Port A
7. Safety Rope Hole
