

BASIC

Clear sound, unrivalled comfort
and easy accessibility for everyone

museo guiding solutions

ERGONOMIC & COMFORTABLE

Uses and tour types:

The **Basic** is a manually triggered audio guide with a **built-in speaker**. Visitors choose what content they want to listen on the **Basic** by entering an appropriate number into the device's numeric keypad.

Content numbers for the **Basic** are generally placed on signage close to your point of interest or on a tour map provided at reception. The **Basic** does not require any technical or electrical installation for your tour, making it particularly suitable for simple scenographies.

Thanks to its low power consumption and a battery life of 6 to 12 months, maintaining your **Basic** audio guide fleet is simple and trouble free.

How the Basic works:

The **Basic** has a **built-in speaker** that doesn't require headphones. Its **ergonomic design** ensures that the **Basic** is comfortable for your visitors to hold and position on their ear. For visitors with hearing or visual impairments, the **Basic** can be equipped with a jack socket that enables connection to a **FreeSound** headphone or a high-contrast keyboard.

The **Basic** does not require an electric charging rack, which significantly reduces handling, operating costs and the need for a large dispensing area.

BASIC

AUDIO GUIDING MADE EASY

WHY BASIC ?

The **Basic** audio guide has been specifically designed to deliver a simple and accessible listening experience – without compromising on quality! It meets the needs of institutions and locations looking for a **cost-effective, no-frills and easy-to-manage** audio tour solution.

Typical tours for the **Basic**:

The **Basic** is the ideal device for manually triggered audio tours. Thanks to its **built-in numeric keypad**, visitors can easily select the content they want to listen to by keying in the numbers found on your signage or tour plan.

The **Basic** is a perfect solution for simple audio tour scenographies at venues or locations that do not require technical or electrical installation.

The **Basic** under the microscope:

Thanks to its built-in speaker, the **Basic** is simple and easy to use. Its ergonomic shape ensures comfortable handling and positioning on the ear. The **Basic** has been designed with inclusivity and accessibility in mind. It offers an optional head-phone jack and a high-contrast keyboard for people with hearing or sight impairments.

Simplified management:

The low power consumption of the **Basic** allows you to control operating costs and simplify your audio guide fleet management. It has a **battery life of 6 to 12 months**, which significantly reduces your need for storage and charging.

Conclusion

The **Basic** is more than just a simple audio guide. It's the perfect solution for any institution, venue and location looking to provide a quality listening experience without getting swamped by technical or financial issues.
