

INTUGRID HZE11x

AUDIO REMOTE CONTROL PANEL

PREAMPLIFIER

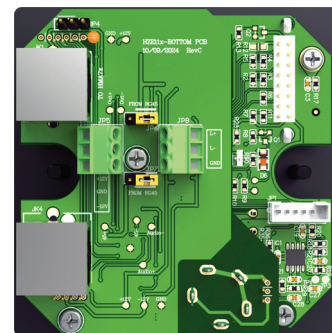

CONCEPT

The INTUGRID™ HZE11x provides a local control frontend for Intusonic's IntuLink™-enabled audio control system, whereby its display provides ultimate status clarity and user comfort. It fits standard BS5733 wall boxes offering flush or surface mount options. A standard CAT network cable is sufficient for connections; no additional power supply is required, although external powering is possible. Due to its daisy-chaining possibilities, more than one unit can be installed in a room, with the last operated unit setting the system, and those settings being replicated on all HZE11 panels as well as the connected main unit. A local audio feed is possible via the provided 3.5mm jack for a stereo signal or alternatively via a 6.35mm jack for a mono microphone, and an additional preamp input can be activated if more complex external input arrangements are required. An infrared remote control receiver and the included IRB44 remote complete the HZE11x.

FEATURES

- ▶ Replicates all main unit controls: source selector, volume control, display content
- ▶ Additional local inputs: stereo 3.5mm line & mic 6.35 mm TRS (front), balanced mono line (rear)
- ▶ Mono transmission of local inputs to main system
- ▶ Connection to main unit via standard Cat5/Cat6 cable
- ▶ Assignable to one of 8 zones via software menu
- ▶ Multiple units can be daisy-chained with "last setting rules" system
- ▶ IR remote feature (IRB44 remote control included)
- ▶ No PSU required - power provided by main unit (max. 50m - external power possible if needed)
- ▶ Compatible with all IntuLink™-enabled Intusonic products
- ▶ CE/ROHS compliant
